

greenHVG

Our commitment to
a sustainable future.

Continually evolving and forward thinking, with a sustainable future front of mind.

At HVG Graphics Media, we are constantly evolving our product range to ensure that we are intentional in our product offering. We refine our portfolio with a focus on the needs of our customers, our grasp of international trends, and our deep-rooted understanding of the Australian market.

We, at HVG Graphics Media, have made a commitment to take our forward thinking another step further and continue to shape our product portfolio with a sustainable future front of mind.

Though our range of environmentally conscious products continues to grow, we are currently stocking and distributing a range of pressure sensitive films, printing media, substrates and fabrics that align with our ecological values and meet sustainability industry standards.

We strive to support industry suppliers who adhere to environmental best practices, including:

- The application of sustainable management principles to help safeguard forests and ensure all paper is FSC® certified
- The reduction and elimination of processes which result in pollution of waterways
- The reduction of environmental damage or risks related to the use of hazardous chemicals by meeting REACH & RoHS compliance
- The reduction of energy consumption and carbon emissions in production
- Increased use of recyclable content, that can ultimately be re-used in the product cycle

Digital Print

PVC-free films

PVC-free floor graphics

PVC-free self adhesives

PVC-free wall coverings

Recycled printable fabric

VOC-free wall coverings

Substrates

Paperboards

PVC-free substrates

Recyclable rigid substrates

Certification

We curate our range of greenHVG products to ensure we meet and uphold industry best practice, by upholding globally recognised sustainability certifications.

Sustainability

We partner with suppliers who actively pursue manufacturing practices towards a more sustainable future.

PVC Free

Our range of industry leading PVC alternatives provides you with the power of more sustainable choices.

Recycling

Through sourcing sustainable supply alternatives, distributing green offerings to the end user, and promoting pathways for recycling and reuse, we are able to close the loop in our supply chain.
