

# A MondoSign<sup>®</sup> to outlast them all Printable. Non-combustible.

# MondoSign<sup>™</sup> is a high-quality, solid aluminium sheet used for signage and other print applications. It performs well in both interior and exterior environments.

Made from 3003 marine grade aluminium alloy (H-24 temper). The product has an optimised PET matte white paint for digital UV and latex inks, with mill finish on the reverse side. The sheet is designed for flat sheet signage applications and direct digital printing.

# Ideal for hot, harsh Australian conditions

MondoSign<sup>TM</sup> offers exceptional fire resitance, it is non-combustible in accordance with AS1530.1 standards.

MondoSign<sup>™</sup> is designed to be corrosion resistant, utilising a marine-grade alloy, it will not oxidise, making it an ideal choice for all locations.

# Ideal for Corporate Identity

Use as building signage internally and externally, lightboxes as well as RV vehicles.

# Easy to work with

MondoSign<sup>™</sup> makes fabrication easier when folding, routing and cutting.

# **Stocked in Australia**

MondoSign<sup>™</sup> is stocked nationally, with fast next day delivery services available.

# Eco-friendly in more ways than one

MondoSign<sup>™</sup> can be recycled, there are several recycling programs including \*EnviroSmart<sup>™</sup> that seek to help businesses provide an end-to-end solution in a cost effective and safe way.

Up to 95% less energy is required in the recycling of aluminium, compared to other primary metals leading to greater reduction in emissions and contributing to the future health of our planet.

# Not sure what product to use?

Call us today. Our experienced team are available to provide technical knowledge about the full range of HVG Graphics Media products available.
