

Re-board® Premium is the original rigid paper board. It is incredibly lightweight yet exceptionally strong and fully recyclable. The unique engineered fluted core of Re-board® ensures excellent planar flatness combined with design flexibility to create any shape.

Re-board® Premium can be digitally printed or finished to achieve stunning results. The smooth, low-reflecting surface provides perfect readability and quality image reproduction, with high gloss contrast.

Re-board® fluted core is tilted to 15°, a prize-winning design feature that builds on the original Re-board®. The engineered core provides the perfect strength to weight ratio and enables a Re-board® sheet to be rapidly cut into any conceivable shape with perfect lines, angles and shapes. Accurate cutlines make mounting easy and reliable.

Re-board® Premium liner is made from 100% ECF renewable virgin fibre from sustainably managed forests. The multi-layer structure and double-coated top side ensures crisp folding and demanding finishing.

Re-board® Premium liner and core contain no plastics and are made of 100% paper.

Re-board® Premium contains no harmful components and utilizes water-based adhesives. The board can be recycled as paper in normal wastepaper streams found throughout the world.

Re-board® is the first rigid paperboard in the world to independently measure its CO2 emissions. Based on CEPI and ISO 14040 guidelines.

Technical specifications

Length (mm)	1500 to 3200
Width (mm)	1220 and 1600
Thickness (mm)	Standard 10 and 16 Range: 8-30
Weight (kg/sqm)	1.5 (10 mm) 2.0 (16 mm)
CIE Whiteness (%) ISO 8254-1	135
Brightness D65 (%) ISO 2470-2	103
Gloss Hunter (%) ISO 82541-1	48
Smoothness PPS 10 µm ISO 8791-4	0,9

Certified Management Systems

Re-board® Basic is produced in Norrköping, Sweden.

The production facility is FSC Chain of Custody certified according to FSC-STD-40-400
